

Wm

Dear Mr Thomas

Your parcel has arrived and will be attended to with the other similar things already on hand, and ~~of~~ such specimens as you ask to have returned I shall ~~attend~~ duly mail to you.

Do you know of the manolepis in the limestone are usually in little patches or scattered uniformly in the strata planes, and if any remnants of other tissues occur with them

The pamphlets have also arrived, and will be retained until return of Dr G. M. Dawson, who is I suppose now on his way from British Columbia.
