Jul. 16<sup>th</sup> 94.

Sir S. W. Dawson.

Dear Sir. —

With much pleasure I received your letter announcing your intention to devote further attention to the study of <sup>the</sup> Carboniferous and Permian floras of these Provinces. The result of your labors will not only be valuable to your friends but to science and the scientific world. The emergence of the Carboniferous into the Permian forms is a subject of very great interest. I will be very glad to supply any data or specimens in my power to furnish.

Truly yours Francis Bain.
