~~IV. PLANTS OF THE MIDDLE AND UPPER COAL-FORMATION.~~

These have already been illustrated in some detail in my memoir of 1866 already referred to, and in Acadian Geology; and though much new material has accumulated and many species have been inadequately figured, it may be some time before any full illustration of these plants can be attempted. For this reason, I give here a list of the species recognised in these groups of strata.

To avoid repetition of references, I may state that the new species established by Bunbury will be found in his papers in the Journal of the Geological Society, Vols. III and VIII. Those established by myself will be found in my paper in the same Journal, Vol. XXII, and my Acadian Geology, 2nd edition, 1868.

4. MIDDLE COAL-FORMATION, NOVA SCOTIA AND NEW BRUNSWICK.

- ~~D.~~ ~~annulatum, Dawson.~~
- ~~S.~~ ~~Sigillaria (Favularia) elegans, Brongniart.~~

CANADIAN FOSSILS.

- T. ~~uv~~ rotundum, Dawson.
- Rhabdocarpus — ?
- Calamites cannaeformis, Brongniart
- C. ramosus, Artis.
- C. Voltzii, Brongniart
- C. Nova-Scotica, Dawson.
- C. nodosus, Schloth.
- Equisetites curta, Dawson.
- Asterophyllites foliosa, L. & H.
- A. grandis? Sternberg,
- A. trinervis, Dawson.
- Sphenophyllum emarginatum, Brongniart
- S. saxifragifolium, Sternberg.
- S. Schlotheimii, Brongniart
- S. erosum, L. & H.
- Pinnularia capillacea, L. & H.
- P. ramosissima, Dawson.
- Noeggerathia dispar, Dawson.
- N. flabellata, L. & H.
- Cyclopteris (Neuropteris) obliqua, Brongniart
- C. (? Neuropteris) ingens, L. & H.
- C. oblata, L. & H.
- C. fimbriata, Lesquereux.
- C. hispida, Dawson.
- Neuropteris rarinervis, Bunbury.
- N. perelegans, Dawson.
- N. Voltzii, Brongniart
- N. flexuosa, Sternberg.
- N. Loshii, Brongniart
- N. acutifolia, Brongniart
- N. conjugata, Goepfert.
- N. attenuata, L. & H.
- N. dentata, Lesq.
- N. Soretii (Brongniart)
- N. cyclopteroides, Dawson.
- Odontopteris subcuneata, Bunbury.
- Dictyopteris obliqua, Bunbury.
- Lonchopteris tenuis, Dawson.
- Sphenopteris munda, Dawson.
- S. decipiens, Lesquereux.
- S. gracilis, Brongniart
- S. artemisiæfolia, Brongniart
- Sphenopteris Canadensis, Dawson.
- S. Lesquereuxii, Newberry.
- S. microloba, Guttbier.
- S. obtusiloba (?), Brongniart
- Phyllopteris antiqua, Dawson.
- Alethopteris Grandini, Brongniart
- A. pteroides, Brongniart
- A. Serlii, Brongniart
- A. grandis, Dawson.
- Pecopteris abbreviata, Brongniart
- P. plumosa, Brongniart
- P. polymorpha, Brongniart

5 UPPER COAL FORMATION, NOVA SCOTIA, NEW BRUNSWICK AND PRINCE EDWARD ISLAND.

- Dadoxylon materiarium, Dawson.
- Walchia (Araucarites) gracilis, Dawson.
- Walchia (Araucarites) robusta, Dawson.
- Sigillaria (Rhytidolepis) scutellata, Brongt.
- Calamodendron approximatum, Brongt.
- Antholithes squamosa, Dawson.
- Rhabdocarpus insignis, Dawson.
- Trigonocarpum Noeggerathii, Brongt.
- Calamites Suckovii, Brongt.
- C. C. C.

 Cistii, Brongt.
- C. C. C.

 dubius, Artis.
- C. C. C.

 gigas, Brongt.
- Asterophyllites equisetiformis, L. & H.
- Annularia sphenophylloides, Zenker.
- A.

 longifolia, Brongt.
- Sphenophyllum longifolium, Germar.
- Cyclopteris heterophylla, Goepert.
- C.

 oblongifolia, Goepert.
- Neuropteris cordata, Brongt. (and var. angustifolia).
- N.

 gigantea, Sternb.
- N.

 heterophylla, Brongt.
- N.

 auriculata, Brongt.
- N.

 rarinervis, Bunbury.
- Odontopteris Schlotheimii, Brongt.
- Sphenopteris hymenophylloides, Brongt.
- S.

 latior, Dawson.
- Alethopteris lonchitica, Sternberg.
- A.

 nervosa, Brongt.
- A.

 muricata, Brongt.
- Pecopteris arborescens, Schloth.
- P.

 rigida, Dawson.
- P.

 unita, Brongt.
- P.

 oreopteroides (?), Brongt.
- Beinertia Goeperti, Dawson.
- Palaeopteris Acadica, Dawson.
- Lepidodendron undulatum, Sternberg.
- Lepidophyllum lanceolatum, L. & H.
- L.

 trinerve (?), L. & H.
- L.

 sp.
- Lepidophloios parvus, Dawson.
- Cordaites simplex, Dawson.

robu

To this last list it is possible that a few species may be added from my more recent collections, in Pictou County.

Of the above species those which may be regarded as the most characteristic of the Newer Coal-formation, as distinguished from other members of the Carboniferous system, are perhaps *Dadoxylon materiarium*, the species of *Walchia*, *Annularia sphenophylloides*, *Neuropteris auriculata*, *Pecopteris arborescens*, and *Cordaites simplex*. *Calamites gigas* is found only in the newest beds of the Upper Coal-formation.
