

Mitchell,

Dec 17/81

Dear Sir,

Since writing to you
I have looked up some
additional specimens of the
Campbellton & St John Spruces
in ~~the~~ the course of labelling
plants from those places.
It seems that no difference
can be made out some
of the St John examples
being quite near to the
others. I am inclined
therefore to regard them as
of one species and shall
so label them and
note them when I describe

W
Whiteaves

Spurber
