Sir. J. W^m Dawson

McGill College

Montreal

(Canada)

Lausanne 7 mai 1887

Dear Sir

Please excuse me not to have answered sooner to your kind letter of Febr. 5th. I was overcharged till lately.

You are quite right to wish that your great Canada be better represented in the Geological Congresses. But it depends only from yourselves. You might form a Canadian Comité, and send to London in 1888 some representatives. I am quite certain they will be very welcome, and one of them will be immediately elected in the Counsel of the Congress.

Unhappily the work does not advance much. The German Directorium of the geol. Map. does not give any sign of life! Every body perseveres in ones own traditions! Unification is a very arduous and difficult matter. Sincerely yours Edrenvics prof.
