

Bearwarris 29<sup>th</sup> Sept 1876

My dear Dr Darwin

I enclose a letter which is not a formal testimonial but which may be of more use than a testimonial if you see fit to use it. I should think Selwyn would do us Logan used to do, viz: recommend the best man & he will be appointed. I should be very much surprised if a

Palaeontologists were appointed  
in England to our survey without  
my advice being taken. I  
will write to Selwyn about it.

I am not likely to be  
this year at Slargylog, I  
am so busy with a mass  
of indoor work, and am besides  
on the verge of starting for  
Gibraltar. Next time you  
have a chance to write will you

Say if the rock in your  
Opinion certainly contains a fossil,  
& if so what you think it to be.

Ever truly  
And<sup>y</sup> Ramsay

Ramsay
