DEPUTY HEAD AND DIRECTOR,

MUSEUM AND OFFICES, SUSSEX STREET, OTTAWA.

March 18 1895

My dear Father,

The little collection I am speaking of
"N. of Lyttan" is no doubt one you examined
before. It is Cretaceous, & you supposed
might be about Dakota. I have a list
you would know.

Peltanus obtusiloba, or near.

Magnolia tenuifolia, probably.

Menermites, like M. grandis

Laurophyllum

Sequoia & other prosevents.

I have enclosed this little list in my
report on Kawloops sheet now in MS.

Yours
G. M. Dawson
