Elora June 24 - '76 -

P. Rice, Dawson, dear Sir, I forwarded the specimens of Stromatopora for your inspection a day or two ago - also other three fossils which I would be thankful if you would name. Was the one in three pieces a double spiral? Is it a Murchisonia?

How do you account for the presence of the three opercular processes upon the pleurotonemid?

Trusting the objects you desired to see may prove worthy of your examination, and that you may have a bit of Logoon Canadensis to spare when you return them, I remain most respectfully

yours - David Boyle.
