

load of the debris has  
always been production of  
new or less paper. Many  
of them in a very good state  
of preservation. Some lovely  
specimens are now on my  
table

I am dear Sir  
Very faithfully yours

Allant S. Hill  
W. Dawson.

Hill

Loggins Aug 8, 76.

Dear Sir,

I greatly regret that I  
have not yet been able  
of writing about the Survey  
Report as through the  
kindness of Mr. May I  
received a copy with the  
descriptive Catalogue of  
the Economic Minerals of  
Canada a day or two ago.  
in haste. Please accept my  
thanks for your kindness  
in the matter. I have as

yet get nothing from the  
Paper stamps that I can re-  
cognize as a Conulus though  
several fragments appear  
to differ in situations from  
Paper as well as seeming  
to belong to a larger shell

The stamp has yielded quite  
a number of very good specimens  
of Paper all of which  
I will forward in the box  
to Montreal about Sept 16<sup>th</sup>  
with the fragments mentioned  
The brother has been so

inassent but thro' I am  
forced to lay over the taking  
out of the stamp in the reef  
for a little while but will  
attend to it at the earliest  
possible day and forward  
results.

I will continue to take an  
occasional half hour at  
times of Paper all of which  
the paper stamp was about  
a conulus or anything else  
unusual now or Secula  
will send it immediately  
An examination of an
