Dr Dawson.

Dear Sir.

I received your letter this morning and also Gumbel's paper. I have shown your letter to Prof. Dana, & as you have given it into my charge, it will be published in the October number of the American Journal, if you do not object. I am very much obliged to you for interesting yourself in these specimens, & if I can in future find more & better specimens I will send them to you. I should very much like to show you some of my rocks, & sometime when I am in New Hampshire I would like to bring some sections up to Montreal to show you.

Yours respectfully,

George W. Hawes

James
