

The Office of

James Dakers,

Secretary and General Manager.

Telegraph Buildings,

St. Sacrament & St. Francois Xavier Streets.

Montreal, 187

Dear Sir,

The route by which our Telegraph line now runs will not give the visitors to Little Metis direct communication with St Oetave Station but all the messages will have to be repeated at Rimouski. To alter our line so as to make direct communication would require 200 poles which can be procured for \$80- the expense of wire & altering would cost nearly double that amount but if the \$80 for the poles can be raised I will recommend to the company to make the alteration so as to accommodate the Summer Visitors to Metis.

Please reply as the poles must be got out during the Winter.

Yours truly

James Dakers
