Dear Dr. Dawson

Your of the 29th is
received. In reply I shall
be happy to comply with
your kind wishes and send
you a paper for the 26th Inst.

The Title will be

'Notes on some geological
features of the Northern
Labrador Coast?'

In order to render it more
interesting, as well as to enable
you to make some comparisons
I will send a box of specimens
I am glad you refer to

That is, or coast is, as
looming up again, for the
observations I was able
to make of its effects are
likely to interest you, and
these will be included
in the paper.

Very truly yours

Henry David

Principal Dawson F. R. S.
