Dear Sir

I beg to call your attention to the accompanying work on "Bible Animals". This work has been prepared by the Rev. J. H. Wood M.A. the eminent naturalist of London, Eng. whose name is I think sufficient guarantee that the book will be all it indicates.

This edition has been specially prepared and has very valuable essays by Dr McCosh on "Evolution" and Dr March on "Bible Travel and Research" added so as to make it a complete hand book

for all readers of the Bible  
In commending the  
work to your attention  
I would ask the favor  
of a few words of kindly  
approval of its contents,

Dear Sir

Your obedient servant
