Prof Dawson

Dear Sir Some weeks ago your
son was kind enough to send me
the records of sundry observations made
in the far west & expressed a wish that
sooner or later they should be returned
to him - I gave them out to be
copied ^{by one of my assistants} at his leisure; ~~at his leisure~~
owing to pressure of
other business they have only now
been returned to me.

Will you please see whether
you think that I had best
return them to you for safe
keeping, retain them here, or
send them to your son in B. C
or rather in any case
in the latter case will you be
kind enough to give me his
address.

Yours truly

G. T. Kingston
