

is necessarily a large one -  
will be undertaken whenever  
possible, and will include not  
merely the stratigraphy, lithology  
and palaeontology of the rocks,  
but also the mineral wealth,  
character of the soil and many  
more important particulars.  
Anything of interest will be  
duly forwarded to the "Naturalist"  
for publication therein.

Thanking you for past  
favours,

I remain

Yours truly

Dear Sir,

After some delay  
I have succeeded in com-  
pleting a small map, or  
rather two of them, to  
illustrate the notes on the  
Eozic outliers near here.  
I regret that I have not  
done so before; the delay has  
been caused by my many  
duties. I did not think it  
worth while to send one  
of the outlier in Prince Ed-  
ward County especially since

I have not had time to take out a chain and compass to survey it. I have partly been delayed by Prof. McCowan who promised to give me a list of plants growing thereon, or at least some information relative to them.

The "Murchison Club" a scientific society here have appointed me to thoroughly and systematically work over the geology of the county - a very necessary work since this work has even in the Geological Reports been done very superficially. This work, which

P. S. Having very recently visited the Hannamville pathies with Professor McCowan, that gentleman acknowledged that he had been deceived by some of the pebbles in the conglomerate, having imagined them to be portions of another rock. A careful examination convinced him that my view was the correct one.

9-12 H. N.
