Prof. Dawson,
Dear Sir,

I have two splendid specimens of the Long billed Gar-pike (Lepidosteus ossius) for sale. I took them at Missisquoi Bay about three weeks ago. I have stuffed them in order that they be placed on boards to hang against the wall. The ♀ is three feet six inches in length - the ♂ something less. I want \$8.00 for the pair mounted. If you should have

(S. Munnell)

no these fish in the museum
I think you should
possess them, as the sexes
are determined and they
would be quite an acqui-
sition to the Collection

I am
yours truly
J. M. Cooper

Prof. Brewster
Dear Sir
I have two splendid
specimens of the sharp billed
fish - the (Lepidobrama curvicauda)
for sale. I took them at
Hingham Bay about three
weeks ago. I have taken
them in order that they be
placed on board to hang
against the wall. The
of these fish is in length
the 1 1/2 inch long
I want \$2.00 for the
pair please.
