September 11th 1877

Dr. J. M. Dawson L.L.D.

Dear Sir,

I have recently seen an advertisement of a Book published by you entitled "The origin of the World"; and in this morning's "Globe", there is a Notice of it; by which I find it goes over ground that I am not unfamiliar with, and the subject is interesting to me.

You are probably not aware, that in 1870, I published a work of 500 pages, entitled "The Two Great Books, of Nature and Revelation; or the Codex and the Logos." This embraces the whole subject embraced in your volume, and goes over entirely new ground: the end being to show, that when these Two Books are rightly understood, in accordance with the laws of the Divine Language; & the laws of creature order and operation, there is not the remotest conflict, or even divergence. But I open up an entirely new view, going back to ^{the} primal, or Symbolic

language of pre-historic times; & those universal
laws which govern every where in physical creation
— whether mineral, vegetable, animal, or human —
— here I show how from one common — self-existent
Centre (God), the whole Universe had its origin
— more especially our solar system; & the suc-
cessive formations on this earth, up to Man;
& the various human races. The true intent
& meaning of the Scriptural history of the Creation
& Flood; embracing not only Cosmogony — but
Ethnology — Geology, & Philology. — I think,
from what I see in the above Notice, (in the Globe)
that we have some views in common, on the
above subjects; and my main reason in addressing
these few lines to you, is to propose an exchange
of a copy of each of our Books. They are each
published at the same price: and if it
should be agreeable to you to do so; and you
will send me an order on your Bookseller
in this City for a copy — I will be happy to
mail a copy of mine to you immediately —
Very respectfully your
Geo. Field.
