

Hunt

Boston Nov 7th 1877

Dear Dr. Dawson.

in reply to your
inquiry I regret to say that I cannot
find any reference to Lorell's description
of Monocratonon or Diplocratonon or
yet of Prodyellia. all I could find named
to me. I have looked in Leach's News
Dahrbuch for 1875 + 1876 (two vols.) also
in the Fed. News for 1874 + 1875 in
vain. I will write to Dr. Shaler and
ask if they have any notice of
them at Cambridge. I suspect the
account is in some Swedish memoir
I remember Lorell promised to send
me an account of them. I know
Lesley has seen some account of
these species. but I do not like to
trouble him if I can find out else-
where. I write to Shaler today.

I expect to learn something in

Sunday morning 29th. I remain till
Saturday p.m. and then hope to see you.
With best regards I remain

Very faithfully
Yrs

J. Henry Hunt

P.S. I have now in print and will send
you very soon copies of my new volume
on about the Paris Congress with
extracts from the Circular of the Local
Committee
