

Princeton Review.

47 Park Ave. New York  
Feb 7. 78.

Dear Mr. Dawson

I have not as yet seen  
the MS. "affinities of certain  
organic forms", and do not  
wish to go to press until I can  
obtain it.

The scientific discussion  
of such a subject in the Review  
would open its field to a  
large class who have ever  
been excluded.

Please forward the same  
before the 15<sup>th</sup>. I see a programme  
of lectures delivered by you  
in Montreal & presume that you  
have been hard pressed

Very respectfully  
for you all. Peckey
