

McGILL UNIVERSITY ARCHIVES
ACC. NO. 2211/59
REF. 88

McGill College,
Montreal.

July 14, 1848

My dear Sir
I have read Mr
Silpin's Report with care.
The parts he advises should
be put down if possible
to mark the corner.

As to a square hole
in 45, this would give
more hematite and would
correct the somewhat
violated no 32 with the
other properties.

I think the right
in no 31 should scarcely
be abandoned, as this
would injure nos 21 &
27 and no 31 itself
certainly contains some

Memorandum,

The learn agreed
for a new report of
search on no 108 is
certainly found, and
a further extension of
seamite would ~~be~~
be desirable. ^{The specimen} ^{made the 30} ^{be}

The shareholders
should consider these
points in ~~the~~ view
of the value of the
properties in question
on the one hand
and the desirability

of avoiding expense on
the other,

Truly yours

W. Darwin

Truly to abide of descent of
Capt. Macbaldy

and of the other part
will also be made

Peter In
Letter to

Crawley

Sept 18/88
