

Montreal 20 March 1878

Dear Sir,

I am just in receipt of your favour of yesterday. Please accept my best thanks for your opinion on the instrument, and your promise to recommend it to your students.

In reference to using the Polariscop with this Microscope, I believe that ~~an~~<sup>was</sup> anticipation, as in his letter Mr Parkes says that, "a Polariscop can be fitted to the New Microscope for £1.7.0 which" which I think implies that it is fitter for the Polariscop and I dare say for the Camera Lucida also. —

I would thank you, if convenient, to give me your

P. Murphy

opinion as to which power  
would be best to get with  
these instruments — for the dup  
set. viz the 1/6 or 1/7 in objectives.

The bearer will bring  
down the instrument, please  
let him have it.

Yours very truly  
Edw Murphy
