Albany, N.Y. 31st 1878

Prof J. W. Dawson.

Dear Sir,

Tomorrow
I will send by mail a
package containing a few
specimens. A number upon
each refers to the enclure
slip with this note. I send
species that are not common
in a well preserved condi-
-tion. I hope that you may
be pleased with them. I
have made seven sections from
the two unetched specimens
of Eozoon. They show the
canal system, ^(see all) surrounding
walls and larger canals. They
are very interesting and
instructive. I had spec-
-imens from Warren Co of
this State which were

Walcott ~~has~~ sent me ~~the~~ for Euzoon. I
never could make it out
& left the matter in doubt
until I examined the sections
made from your specimens.
If you wish I will send
a small box of fossils by
Express. Over & above what
the balance of exchange may
be you can return specimens
from the Silurian rocks of
Canada. I have Niagara
& Hudson River fossils for
exchange.

I remain

Very Respectfully Yours
Charles D. Walcott,
