

Cypress Hills

Dork Walsh, British M.B.S.

April 14<sup>th</sup>, 1898

Prof. Dawson M.A., LL.D.,

Dear Sir,

I send you by this mail a tooth of what I suppose an extinct animal, found in this locality by an Indian who kept it as a "big medicine". He would not tell me the place where it was found, but described it as a deep gash formed by the spring waters and where there were many large bones of some animal unknown to him. I hope the specimen will prove of some interest to you.

I remain, Dear Sir,

Yours very respectfully,

Jno. G. Pittson, M.D., Capt.  
Surgeon R.C.M.P. Police
