My dear Prof Dawson

I wish to introduce  
to you my young friend  
Dr. Charles Barrois of Lille  
France whose name you  
will have already known.

Dr. Barrois has come  
to this country to study our  
geology for a few months  
and is desirous of visiting  
some Laurentian localities,  
especially that of the Eozoon.

I beg to commend him  
most heartily and cordially  
to your good offices.

Very sincerely yours  
James Hall
