

Albion

College of New Jersey.

Princeton, N. J., Oct 22 1878

My Dear Dr Dawson

I do not know what to do about the Chair of Geology here and will be glad to have any suggestions from you. It is very difficult to find one who is at the same time eminent in science and a Christian man in these times

I will be very glad if I can be of any service to you soon just come from Paris. We have an Engineering department here but in the present we have both a professor and an assistant

I take the Panietan Review and
so will see your Article

I believe that development can
explain much but it must be
restrained.

I have at present 180 young
men studying philosophy under
me - some of them very eagerly

Yours Truly
James Wolfe

Principal Dawson
