

Fredericton. Nov<sup>r</sup> 12<sup>th</sup> 78.

Dr. J. W. Dawson

Principal of McGill University,

My dear Sir,

I think I have already expressed to you the great disappointment felt by the members of the Alumni Association of our University at your inability, on account of a previous engagement, to be their Orator on the occasion of their last Encennial festival. As a further earnest of that disappointment I have now to renew on their behalf the invitation then made, with the hope that the wish you were then good enough to express "that you might at some future time be able to accede to our wishes" may in the present instance be fulfilled. Your intimate connection with the early history and reor-

organization of the Institution makes your selection as their Eucocial orator a matter of special interest to all the Alumni, while your distinguished position, both as a scientist and an educationalist, cannot fail to make the occasion one of more than general interest also to the public at large.

I need not say that the opportunity which such a visit would afford of showing you some of the results of our recent geological work in this field, and possibly of accompanying you on a short trip to some of the more interesting and accessible localities, would be to me a subject of great congratulation.

The date of the Eucocialia for the coming year is the 26<sup>th</sup> of June.

Hoping that no previous engagement will on this occasion stand in the way of our wished for gratification, I remain

very sincerely yours

L. W. Bailey
