

Pattison

11, Queen Victoria Street,

London, E.C.

5 May 1879

My dear Sir

I have taken advantage
of two days' leisure to read carefully
"Life Epochs"; and have availed
myself also of the botanical knowledge
possessed by my friend Mr Churchile of
Clifton (Somerset Mountain Churchile) to
verify both facts & inferences in this
province. I hold the work to be
exactly suitable to the need, & able to
stand & live on its scientific &
practical merits as well as constituting
an invaluable contribution to the
evangelical argument of all classes of
God's word written. It cannot be
popular in the bookshop sense of

PATRICK WILSON GURNEY & CO.
PRINTERS

The A I S, for such subjects
compare with ~~any~~ ephemeral
titles or must ever find audience
few other fits. But I consider it
to be ~~rather~~ of thankful duty to
publish it & that is better out fair
chance of remuneration sale.

I have suggested the omission of two
minor reflections, ~~rather~~ as rather more
controversial than our position warrants.
I have eliminated a line or two as
to Sapras for I find Horner speaks of
rather implies more than one genus &
the one genus referred to by you has
a wide, tho' not European range. The

Observation you make is still
left & is opposite on a somewhat
~~narrower~~ narrower basis than
you put it. I return it to
D'Arny tomorrow with my very
hearty commendation & entreat
what I will support this as
member of the Leprosy Committee.

We are having a sample of
a Canadian winter.

With kind regards

Yours faithfully

M. Pattison

Professor Dawson

Good article by Perb in this
month's *Contemporary* in Ancient Egypt -
generally adopts conclusions about you accept.

would it not be well to refer
specifically over to Southalls Epoch
of the Mammal as a good resume
of the arguments for recovery. It is
wanting in feeling but otherwise good to
certainly useful
