that you will find
them a suitable position
to enable the curious
to see this old and,
I flatter myself, well-
preserved fossil.

I shall send
one specimen showing a
weathered surface,
one cut & polished,
one etched to show
the structure, and

a piece from which any
one interested in the
matter may cut
microscopic slices, or
have them cut by a
lapidary.

I can assure you
I am glad in any
way to reciprocate your
many favors to us
here.

Please do not forget
to send to the University

the structure, but
the other 2 specimens
are set & probably
reworked & refined
the specimen remains
of good work
generally fine.
