

expects \$1- per week for his own extra services
& \$50^{cts} per week for a woman to clean down
Every Saturday night & I think in any
feeh arrangement these claims should be clearly
understood & allowed -

Somerville lectures.

Arrangements have been made for Sept, but
Dr DeSola met me to day & expressed his wish
that Dr Vineberg be invited to give a lecture
on Popular Physiology, even if this involved
a 7th lecture, which if it meets your approval
I think can be arranged - Dr Hunt promised
his lecture in July but he now writes me to
say that he would prefer postponing it till March
& therefore I can take Dr Vineberg's lecture
in July & Dr Hunt's as the ^{7th &} concluding lecture
March 20th - Mr Celozzi has corresponded with
a young friend of his who was with him in
Paris, who is quite willing to give a lecture

on the Exhibition. on payment of Expenses
by \$24⁰⁰ - I think these ~~are~~ ^{amount is} to be paid for
the object & have prevailed on W Selwyn
to give us the lecture himself on March 13th

W Selwyn has some very interesting &
valuable Minerals which he is willing to
present to the Society if we can make
room for their display - Also, geological
& other Maps - I wish to give the lecture
Room a more cheerful & instructive
appearance & to have authority given to
the "House Committee" to furnish & frame
these maps & so with suitable designs
& decorate the walls with hung frames
which would destroy the reverberation
which is now very distressing to the speaker
& renders many speakers quite inaudible.
Especially in a small meeting -

next meeting

A. Conner W. Marler
- H. Miner
Shelton

Mr Logan also consents to give us at
the next meeting his views on the "Larbee group"
which are not in accord with those of Dr
Stuart, nor, entirely, with those of Sir W. Logan
This will therefore provide for Feb 24th -
but if you could also give us a digest of
the subject submitted to you by Mr Scaevan
of the Mammoth Elephant the tooth of which
was exhibited to us on Mondayth - ^{pray do so.} The
measurements of those bones would be sufficient
good material for an interesting item -
I want authority for hire of piano for the 1st
Somerville Lecture for Mr Barnes' illustrations
& for printing a programme, but if you
think it unnecessary to call another Council for
the purpose, I will act on your instructions
in time I should like to mount some of these
maps for the lectures, & would like to meet
you at the rooms. say 12:30^m Saturday, next to see
what can be done. I am Yours truly W. Edward
