

Danville, Dec. Feb. 10-1879.

Prof. J. M. Dawson.

Montreal Can

My dear Sir,

The fossils have
all arrived there from Canada
more or less but already
in my collection.

The small *Murchisonia* sent you &
returned really was found
associated with the other fossils
sent, and as per request I here
with return it to you for desc-
ription.

With the hopes of hearing from
you more definite as regards the
Murchisonia I remain

Very sincerely yours

Wm. Guile
