

Dr Carpenter

London April 27
1879

Dear Dr Dawson

This will be delivered
to you by my eldest Son,
of whose intended visit
to Montreal you will
probably have already
heard from me. I feel
sure that you will be
glad to put him in

the way of seeing what
will be best worth the
attention of himself and
his friends in Montreal.
That he was Local Secre-
tary to the Meeting of
the British Association
in Bristol a few years
ago, will ^{assure} you ~~that~~
of his interest in Scien-
tific matters, although,

being actively engaged
in business, he has pur-
sued any special branch
in detail. He will tell
you what a large col-
lection of Eozoon prepa-
rations I have now made,
and will confer with
you as to my projected
publication of an ex-
haustive Memoir, which
may give the scientific

Would the means of
forming an intelligent
judgment upon its organic
or inorganic nature

Believe me

yours faithfully

William B Carpenter

Dr Dawson
