June 10, 1879

My Dear,

After your
departure from Montreal
I regretted not having
mentioned to you

the name of Mr
J. M. Le Moine of
Quebec, who is very
well acquainted with
our birds, and has

I believe a large
collection.

I may add that
on looking over the
book by covers used
I mentioned I think
you would find it
amply sufficient as
a book of reference.
The title is - "Key

My son, D. F. M. Duvern
carried it with him
in his expeditions as
geologist to the Boundary
Commission, and in²
formed me that
he found it very
satisfactory.

Very respectfully
Yours
W. Duvern
