Dear Sir

I have been much concerned about the influence of the alleged antiquity of man, and the related theory of evolution, on the minds both of Khampeesee and the unpeely. For my own satisfaction, and that I may endeavor to remove the doubts that have been begotten in the minds of others, I have been giving some attention to the facts on which these

Theories have been based.

I am reading with great pleasure your "Story of the Earth and Man." And my friend Mr. Pattison of London has kindly lent me your article in "The Princeton Review - Points of Contact between Science and Revelation." which I have been endeavouring to obtain through a Bookseller here, and by writing to a geological friend in London, but without success. I have no doubt that it is sold by your Bookseller in Montreal, and if he would

send me a copy, I should be
much pleased, and would
send the price and postage
per return.

Please accept the accompanying
Pamphlet on "The Man of Sin".

Hoping you will excuse my
troubling you, and with
much respect. I am

Yours very truly
Bryce L. Young
