

Dr Gray

HERBARIUM OF HARVARD UNIVERSITY,
BOTANIC GARDEN, CAMBRIDGE, MASS.

April 21, 1880.

Dear Mr. Dawson

Yours of 20 is this
moment received, and order
has gone to publisher to send
you a copy of the new
Structural Botany.

If I mistake not, you
will find it better for your
purpose than before - as
it is.

It is intended to contain
just what is wanted for
your general course, & to
lead to use of Manual &
the new vols. when they
come (a year or two hence)
are for more particular advanced
instruction in Structure & Phys-
iology & Cryptogamy.

I shall be glad if all
you are to send me,
and am pleased that you
take kindly to my
sermons - which appear,
from evidence to have
come to me - to have
done some real good,
on either hand

When you &
Miss Dorem - or
Mrs. D - are to see
your Cambridge friends?

In haste Truly
yours

Asa Gray
