COMMENCEMENT on fourth Thursday of June.

# WEST VIRGINIA UNIVERSITY.

Morgantown, W. Va. May 10th 1880

Rev. J. W. Dawson

Dear Sir,

I send you today copies of my Report 22, Penna. Geol. Survey, and also P.P. a joint work by Prof. Foulmer and myself. This last volume will have considerable interest for you, and I beg leave to call your especial attention to Chap. 3, pp. 105-120. I should very much like to have your opinion on the whole body of evidence we present in favor of the Permian age of our Upper Barrens, (for a full discussion of the Upper Barren Rocks see Report K Penna. Survey (Stinson)).

I have your "Acadian Geology" and "Devonian Plants," anything else that you could send me of yours or of the Canadian Survey would be very acceptable, Very Respectfully,  
J. Lett Hill.
