PROVIDENCE, R. I., Dec. 7th 1880

Principal J. W. Dawson LL.D

My dear Sir:

I should sooner have acknowledged the receipt of the trilobites you very kindly sent me for examination - and which I now return - I hope in a few days to send you a memoir on the anatomy & - of *Limulus*. I am getting the plates ready (some 25 in all) for a monographical account of our N.A. Phyllopod Crustacea - while in Boston you told me you had at Montreal the shell from the Beda clays of a bivalved Phyllopod and I gathered from what you said that you might feel inclined to lend it to me for identification & to be figured on one of my plates. I should really much like to have the privilege of seeing it - should you please, of figuring it in connection with my memoir - to appear in Hayden's Report for 1878. With thanks for the loan of the eye,
I am, Yours very respy & truly,
A. S. Packard, Jr.
