Ward July 1881

Rochester, N. Y. Jan, 25 1881

Dr. J. W. Dawson.

Dear Sir, Today came your letter  
of the 22, enclosing draft for \$45.89 in  
full payment for the specimens lately sent  
you. Thanks for the same.

The Cast of Beavis - 812. was put upon  
the bill singly in memorandum and was  
I think, not added in in the footing in  
We send it in exchange for the Boozon.  
We put the extra sum to your credit as  
mistaken as you suggest.

As to the Mollus head, you can certainly  
clean it at Marshall. That is if you  
have an immense tank in which to  
keep it thoroughly submerged for 8-12 months,  
according as some expert in such matters, shall  
-ly examining them from time to time shall decide.  
In the maceration the bones of front part of head  
fall all apart, and then in bleaching they wrap

and bend so that the osteologist has  
considerable work to get them properly  
into shape. The bolen is a stunning  
map, with the accumulated dirt and scum  
of a life time stowed between (covering the  
surfaces) of the thousand plates. Two of  
my young men were two to three weeks  
in cleaning them for a while this year.  
All this you can do at Montreal, but I still  
think that it would cost you up to send it  
here. We will however help you with all  
advice as the work goes on. I remain  
in haste Respectfully yours, Wm. H. Ward.

Mr. Barach and Sub (Opticians) have  
good business standing here and a high  
reputation for their work. I have  
seen Mr. W. H. Ward's work and  
have an impression that in what  
I have seen of his work he is  
superior to any other I have  
seen in my life. I have seen  
of his work in the  
of his work in the  
of his work in the  
of his work in the
