

McGill College.
Montreal.

Feb 7, 1881

My dear Sir,

I propose to send
to your address this week
or next a small parcel
of good specimens of *Lomon.*
I shall also add some
specimens of *aporrhais* *ocin-*
dentata, and of a fine
variety of the *Fusus* *toruatus*
of Gould, probably the
same with *septemera*
despecta Lin. These shells
I have abundantly in my
dredgings in the Gulf of

Atlantic.
W.D.

Ms. A. 1. 1. 1. 1.
Lancaster

Lawrence, and Gavey
they are somewhat rare
in England. I wish you
to give me fossils in
exchange for the whole,
and not on private account,
for all of exchange is for
our College Museum.

As to purchases, I have
been somewhat cautious,
as I have to do most of
the work at my own expense
and have already
expended more than \$100
out of my salary in the

present series.

The Tertiary things that
you mention I happen to
be pretty well supplied
with. What I most
want at this moment
are

1 ~~Permian fossils either English
or Russian~~

2 Carboniferous Senecton
especially, Coral &
Crinoids.

3 Devonian fishes of genera
Dipterus
Cuvosteus
Chenacanthus
Diplacanthus.

4 Cambrian Trilobites &c

3 the Cambrian fossils

4 Nautilus & Trilobite

also send
some
large specimens
in
well
canned

C. D. Davis
July 1871

Please send me what
you can of either of
these in the boxes to be
sent, and if you have
good specimens add
them to value of say
£5 (five pounds)

Send also 10 doz ^{each} one inch
flap topped boxes and 5 doz
one and ~~3/4~~ half inch, shallows
^{medium} for mounting small shells.

The above may be ^{published}
sent to Messrs Sampson, Low & Co,
Fleet St London with a state-
ment of contents for the Customs
and marked "specimens of Natural
History & apparatus for the Collège".

Truly yours

C. D. Davis

P.S. I shall prepay my parcel accp the
