Prof Dawson

Esteemed Sir,

Allow me to add my testimony with the many who have given expression of their appreciation of your profound Lectures as delivered in Philadelphia some time since, I had not the pleasure of hearing them, but I judge of their character as spoken of in both the secular and Religious Journals throughout the State, The Lutheran Observer, which is my Church Paper, speaks

in the most Complimen-
-tary terms of their; and
Commends them to the
reading People of the
Church, From what I
know of them (which was
merely extracts) they are
the best ever delivered
in this Country and I
must say they have
set my Soul a glow
with Aestacy, I wrote
to Mr Handwerker of Philad
to lend his influence
in behalf of their pub-
lication, He consented
to do, and expressed
a sincere desire with
me to have them pub-
lished, So in view
of these facts, I was one

of Millions, beg of
You to have them
published so that we
Common People may
have access to them, I
would give most any-
thing for a Copy of them,
for my own use,
I am a Merchant by pro-
fession - not a
Scientist however, yet,
I have been a Student
for some years on just
such subjects as you
dealt upon, I have
enough good sense not
to be a Speaker - but at
all times a Listener
When such Comprehensive
subjects are under
consideration,
Good Sir You will

Pardon me for my
presumption - but I
esteem it a duty
to speak in behalf
of humanity when
the publication of
Your Lectures is to
be withheld, and
the Common People
deprived of so much
good thought when
they are willing to make
Sacrifices even to
obtain it.

May the
Lord move you by His
Spirit to be the mouth
piece of inestimable
good. Yours sincerely,

A. Sewall Wright
