D'Hagen has just received a letter from Prof. Beudantic
in which he calls D'Hagen's attention to
his paper on the fossil flora of the "Bären Inseln"
(Loeblich Academy's Memoirs Vol. 9, nos 7-1871) in
which he gives 2 pages to show that the John's bed to
be the equivalent of the Bear Island group of
Lower Carboniferous, arguing from the plants. Have
you seen the paper?
