

Ogansville Ont.

August 2. 1881

Dr. J. W. Dawson

Sir

Having purchased phosphate lands in this section of Ontario, we are besides taking out massive apatite - engaged in collecting mineral specimens for scientific study. We have on hand crystals of Zircon. Apatite. Hornblende. Sphene &c. We supply Dr. Foote of Philadelphia and being desirous of extending our business in the specimen line we have taken the liberty of writing to you with a hope that from your extensive knowledge in such matters you may be able to give us the names of dealers in mineral specimens in Canada or the United States, with whom

we may see communication

Hoping you will pardon  
the liberty taken by changes to you

We have the honor to be  
Sir
