

Montreal Aug 5th 1881

Professor Dawson M^cCollège

Dear Sir

Will you excuse
me for troubling you,
my excuse being that
I do not know who to
apply to for the information
I want but yourself

There is a pretty serious
Cattle disease in Picton
County N.S. I have tried
to find a cause some day
it is the herbage in the
pastures some by something
else I want to solve it - Could
you recommend to me a
Botanist a good practical
man of experience & reliable
to examine the pastures and
to be one of a commission
to

1994
to report to me I shall
be at Cooks River this week
Stoma last next week
should want to write

Yours truly
J.H. Rife
