Dr. J. Dawson

McGill College

Montreal  
Quebec

Canandaigua N.Y.

Sept 10 1881

Dear Sir.

I enclose to you to-day  
a fragment, the best I can get of a  
Lepidodendron taken from the Portage  
rocks at Naples N.Y. a few days ago. The  
specimen from which this is taken is 2½ feet  
long & 3 inches in width & is beautiful.  
Is it an old species? To be examined at  
your convenience. Yours Respectfully J. McCarty
