

Quebec,
3^d Oct. 1861.

My Dear Sr. Dawson, 5024

None of my young reliable geologists in Montreal would send out to visit some prospects in Beauce. My object is to see if there is anything to them; and if so to have an assay made of the best. I can not afford to pay much.

Your very true friend,
Mr. Ormèl is anxious to have replies necessarily printed and it is a most perplexing question for me.

Sincerely yours,
Dr. W. G. Phelps

Lynel
