

To J^W Dawson Esq.
Montreal.

Dear Sir!

I received your photographs and thank you very much for your kindness.

The 4th volume of my work will bring the documents that even the genus *Hypoplestion* with long ribs, has possessed gills, and was a true *Stegopteron*.

I regret that your Museum can not acquire a series of the *Galvanos*, because the appearance of the second series becomes doubtful, the first not having paid the expenses.

I send you a proof of the new genus *Seeleya* which shall be published in the 4th volume.

I thank you also for the honor given to me through the genus *Fritschia*.

I remain Yours

truly
J^W Dawson
