

Ottawa Ladies College.

Ottawa, Nov 2<sup>nd</sup> 1881

My Dear Dr Rawson

I purpose as  
President of the Literary  
and Scientific Society of  
this City to take on my  
opening address "The Progress  
and Prospects of Science  
in the Dominion:" and  
would be greatly obliged  
if you could give me any  
hints on the subject either  
of facts, or directing me

A source of information  
there is not  
perhaps a great deal to  
say on the main question  
but the subject may afford  
scope for observations  
on what might be done  
and is not done for the  
advancement of Science  
of economic importance  
to the welfare of the  
Country

I hope your  
endowment fund will

Meet with success equal  
to your wants

Our College here  
is doing very well  
but struggling with  
impoverishment

I am  
Sincerely  
A. S. Kemp
