

Trin. Coll. Cambridge  
Nov. 24. 1887.

Dear Mr Dawson.

I owe you  
both a letter + apologies but I  
have really been so busied  
with my many duties that I  
have had no time to write &  
must reserve the story of all  
I have seen + done till my re-  
turn. I sail to S. S. Car-  
man Nov. 30 for Halifax.  
I am here for four or five days  
& have to-day received from the

University the honorary degree  
of L.L.D. a pleasant remem-  
brance of Cambridge.

I have seen some a good deal  
of Geological work within  
the last two months of which  
you will learn by & by  
I have not forgotten the  
coming meeting of the Anti-  
A.S. but spoken to a good  
many people, some of whom  
will probably be with us next  
Summer.

I hear on many sides inquiries  
for you & am charged with many

Kind greetings.

With best regards to Mrs. Dawson  
and all yours believe me  
always faithfully Yrs

T. Strong Arnold

P. S. I read a paper here before the  
Cambridge Philos. Soc. Nov. 28  
on Celestial Chemistry from the  
time of Newtons -

Principal Dawson
