

Answer

Montreal N.S.
Feb. 4. 88

Dr. J. W. Lawson

Dear Sir -

P.S. Can you kindly give
me the address of any firm,
in Montreal or any part of
Canada, that deals in
Botanists' paper & the paper
trays used for covering
shells & fossils in a cabinet?

A. J. P.

I am very
truly
yours
A. J. P.

Dr. J. W. Lawson

Dear Sir -

P.S. Can you kindly give me the address of any firm, in Montreal or any part of Canada, that deals in Botaniacs paper & the paper trays, used for arranging shells & fossils in a cabinet?

A. J. P.

I have seen a label
of your name & address
in your cabinet
I am sure you will
be glad to do so

from the Bluff, containing
the footprints of an animal.

Perhaps they are the same that
Leagan found. The prints
of the fore feet are about two
inches wide & show the impression
of five claws; the hind are not
quite so wide & show only four
impressions made by the claws. The
step is about eight inches, &
the tracks are in nearly an
exact straight line.

Perhaps you may recognize
the fossil from my brief description.

A party from this village found
a small seam of coal on the beach at
the Bluff and are sinking a
shaft in the hope of finding
it in paying quantities.

from the Bluff, containing

exact straight line.

Perhaps you may recognize
the fossil from any bird description.

A party from this village found
a small seam of coal on the beach at
the Bluff and are sinking a
shaft in the hope of producing
it in paying quantities.

I suppose they will scarcely form
any workable beds in such an
early part of the period.

Respectfully yours

A. J. P. neo.
