

Hamtport Feb. 23. '82

Dear Sir -

I ship you by  
freight; today, the slab with  
the footprints, from Horton Bluff.  
Hope it will reach you safely.

Will you be kind enough to  
name the two accompanying  
specimens, if not too much  
trouble? The piece of gypsum  
is from Grant's Wharf, on the opposite  
side of the river from Horton Bluff.  
I think it may be anhydrite,  
but am not sure. The smaller  
spec. are from Winkworth Levee, and  
may be unkinowthite.

It is reported here that  
Mr Kennedy, the ex Prof. at Acadia  
College, has in preparation a text-  
book on geology, especially adap-  
ted to Canadian students.

If this be news to you it may  
be interesting, as Prof. K. is known  
to you.

Very Respectfully  
A. J. Pines

J. W. Dawson L.L.D
