Rochester, N. Y. April 10., 1882.

San Francisco,

Dr. J. W. Dawson

Dear Sir, Yours of March 21.
forwarded from Rochester - has just reached
me, - They write that they have forwarded
the specimens as requested in your letter.
The mounting of the Mesotherium can
not be done until I can attend to it, - I am
just finishing my work here and will start east
in two or three days - will stop over a little on the
way but hope to reach Rochester in two or three weeks,
at the latest, will come on as soon to Montreal with
an assistant and mount your specimens in
quick time. Hoping that our inability to
mount your specimens at just the time you
wished will not greatly inconvenience you
I remain

Very truly Yours

Edwin C. Howell

Ward & Howell

We could send a man who would do the work well but
think on the whole that it is better for me to attend to it personally
E. C. H.

Ward's Natural Science Establishment

Stems and Skeletons of Animals, Invertebrates (Crustaceans,
Shell, Corals, etc.) Glass Models of Bones, Anatomical Models,
Human Skeletons, Skulls and Sections of Bones, etc.
